

Let's Talk Implementation Science!

Held several times throughout the year, *Let's Talk Implementation Science* aligns with the mission of the Implementation and Improvement Science Lab to expand the capacity of faculty and staff in the development, conduct and dissemination of implementation and partnered science.

Topics include but are not limited to partnered research, strategies and methods, implementation and evaluation of evidence-based practices, and measurement.

Sessions are held virtually.

Let's Talk Implementation Science!

VA CARES: Caregiver Support Program Partnered Evaluation Center

Join this month's Let's Talk with Darrius McMillan and Nadya Majette!

They will provide an overview of the unique evaluation efforts done by VA CARES, describe a strong and long-standing partnership between research and operations to improve services for veterans and their caregivers, and demonstrate the tracking database systems used for VA CARES surveys (REDCap and Qualtrics).

VA CARES is a partnered evaluation center between the Durham ADAPT COIN and the VA Caregiver Support Program.
